### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Group II, claims 25-29 and 34-42, in the reply filed on March 14, 2007 is acknowledged.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 is indefinite because it is not clear if the effluent stream in step (d) is from the treated effluent stream in step (c) or if it is the original effluent stream from step (b). Further, it would appear that the effluent stream would have to be heated first with a high pressure steam followed by a medium pressure steam. The following is a suggested rewording of the claim:

(c) contacting the effluent stream with a high pressure steam to produce a first cooled effluent stream;

(d) contacting the first cooled effluent stream with a medium pressure steam to produce a second cooled effluent stream;

Also, please note that the dependent claims would have to be amended to commensurate with the amendment to claim 25.

***Claim Objections***

Claim 27 is objected to because of the following informalities: the claim recites step (g) but there is no step (f). Appropriate correction is required.

***Allowable Subject Matter***

Claims 25-29 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: No prior art alone or in combination could be found to disclose or suggest the claimed steps of cooling an effluent stream from a MTO process with a high pressure steam followed by a medium pressure steam.

Claims 34-42 are allowed.

The following is an examiner's statement of reasons for allowance: No prior art alone or in combination could be found to suggest cooling an effluent stream from a MTO process wherein the effluent stream is cooled to a temperature that is at least 500° F (280° C) less than the temperature of an effluent stream withdrawn from the MTO reactor.
